

Babies and toddlers

Rattles and sensory bottles - if you have any spare plastic bottles, wash them out and you can reuse them to create your own sensory/rattles to create sounds. Talk to your child about the sound they can hear, if it is loud, quiet etc. Here are a few examples for you to do, fill one with rice, you can fill one with water oil and food colouring and fill one with water and glitter.

Marble run - if you have any spare toilet rolls then you can cut and create your own marble run. You don't have to use marbles you can use a small ball.

Also, using toilet rolls and other bits of materials you have around the house you can have lots of fun by painting them and creating lots of fun stuff.
