

Pre- School Activities

Adding and subtracting using pasta - on a piece of paper do a number line of 1-5 and set the correct amount of pasta underneath each number. Do some simple additions for example. $1+1$, $1+2$, $1+3$, $2-1$, $3-1$ and get your child to either add or take away the pasta to get their answer.

Recognising patterns- get some dry pasta and use food colouring or paint to create different colours. Make a pattern of your own choice and see if your child knows what will come next. Make it easy or hard depending on how your child gets on.

Jewellery making

With the coloured pasta that you have, get yourself some string and create some pasta jewellery.

***Please keep practising counting and your phonic sounds**
